How to Ease Your Child's Separation Anxiety

Separation anxiety varies WIDELY between children. Some babies become hysterical when mom is out of sight for a very short time, while other children seem to demonstrate ongoing anxiety at separations during infancy, toddlerhood, and preschool. The trick for surviving separation anxiety demands [preparation](#), brisk transitions, and the evolution of time. I would suggest we parents suffer as much as our children do when we [leave](#). Even though we are often reminded that our children stop crying within minutes of our leave-taking, how many of you have felt like you're "doing it all wrong" when your child clings to your legs, sobs for you to stay, and mourns the parting?
